

**Title: Implants in the posterior maxilla: Surgical and prosthodontic considerations.**

**Presenter:**

**Dr. Emad Elsubeihi**

**BDS MSc Diploma Prosthodontics PhD**

This presentation will outline the surgical and prosthodontic considerations of dental implant treatment in the posterior maxilla for the general dental practitioner. It will discuss selection of cases which can be treated by the general practitioner and those which should be referred to a specialist. Outline different treatment concepts for the treatment of posterior maxilla and the evidence of each concept.
