

**Dr. Sheikh Mohammed Nazar**

### **Educational Qualifications**

Master of Dental Surgery (Periodontics.) -1992, Government Dental College, M.G.R Medical University, Madras, India.

Bachelor of Dental Surgery -1985, Annmalai University, India.

### **Career History**

Specialist in Periodontics and Dental Implantology from September 2005 – till date at City Dental Centre, Abu Dhabi which is managed by Cleveland Clinic, Health Authority - Abu Dhabi.

Member of Dental licensure committee, to assess the Post Graduate Dentist for the license to practice Periodontics, Health Authority - Abu Dhabi.

Specialist in Periodontics and Dental Implantology from Sep 1995 to Sep 2005 at City Dental Centre, Abu Dhabi, Ministry of Health U.A.E.

Assistant Professor of Periodontics from October 1992 to July 1994 at M.A. Dental College and Hospital, Madras, India.

### **Area of expertise includes**

- Specialist Periodontist work related to diagnose and treat patients with Periodontal Diseases at Abu Dhabi City Dental Centre, a referral dental centre with various specialties.
- Treatment planning, non-surgical, chemical adjunctive therapy,
- Novel adjunctive surgical therapy including various flap procedures with or without bone grafts, Guided Tissue Regeneration, Gingivectomy, and Gingivoplasty.
- Periodontal Plastic Surgeries: Gingival grafts, Connective Tissue Grafts, Frenotomies,
- Periodontal considerations in Orthodontics : Exposure of unerupted teeth, TADS ( Temporary Anchorage Devices insertion and maintenance)
- Periodontal considerations restorative and other aspects of dentistry such as Endo-Perio treatments viz.; hemi section, root resection, apical curettage with retrograde fillings, Crown lengthening procedures.
- Practicing Dental Implants Straumann system since 2000.
- Surgical insertion of dental Implants, Guided Bone Regeneration procedure,
- Advanced bone grafting techniques to treat atrophic posterior Maxillary(Maxillary sinus grafting both direct and indirect) bone harvesting and onlay grafts for atrophic ridges
- Soft tissue – mucosal grafts for dental implants.

- Supra structure construction (Prosthetic component) simple and complex
- Esthetic Dental Implants procedures.
- Peri-implantitis diagnosis and management.
- Occlusal therapy and insertion various appliances
- Supplementary Periodontal Therapy.
- Teaching and training Periodontics to National Dental surgeons undergoing Internship program at Abu Dhabi City Dental Centre.

## **Abstract**

### **Title: Beyond Pockets...**

Diagnosing and treating periodontal disease have attained a new light on treatment planning choices.....or has it? Dilemmas sometimes still remain: how, when and where to treat periodontal patients and what outcome can we expect. It all becomes more challenging when one incorporates all these items into a comprehensive dental treatment plan. The approach to the “diagnosis” and determinants of “prognosis” will be presented that will hopefully enable clinicians to better plan successful treatment.
