## COMMUNICATION

---

One of the most important point in our practice is the communication skills with the students, patients, and co-workers. It is an essential skill to have as the delivery of an idea or concept has to be fully correct and understandable to avoid any mistreatment or misunderstanding.

## LEADERSHIP

---

As the person in charge of a clinic, I have to take the role of a leader and a role model to the students and set an example to how they should deal with the patients and colleagues at their work place in a very professional manner.
